STG is different

At STG, service isn't automated—it's personal. Every client is assigned a **dedicated Account Manager**, with direct phone, mobile, and email access. Their role is hands-on: monitoring every stage of your shipment and keeping you fully informed from start to finish.

We are proudly **neutral**. Unlike many others in the industry, we're not tied to fixed agency networks or exclusive agreements. We choose the **best supplier for each job**, based solely on your needs, not ours. Every partner we use is rigorously vetted—many we've worked with for decades.

Our mission is simple: **to help your business grow**. Whether your cargo is standard or oversize, local or global, one move or a hundred, we're here to deliver—on time, on budget, and with confidence.

Commitment

Every contract is managed to the highest professional standard.

Innovation

We look for smarter, more efficient ways to deliver your cargo.

Experience

Decades of insight mean we solve problems before they arise.

Confidentiality

All projects are handled with absolute discretion.

STG - The Specialist Freight Forwarder

Premium service. Competitive pricing. Trusted expertise. Whether by road, sea, or air, we deliver tailored logistics solutions for complex, time-sensitive, and oversized cargo. From a single urgent shipment to a full-scale project move, involving multiple methods and routes, we handle it all with precision, control, drawing on decades of experience. **Whatever your cargo, wherever it's going - STG is your trusted partner in specialist freight forwarding.**

Road Freight Powered by Flexibility

From factory gate to final destination, road remains one of the most adaptable and efficient modes of transport. At STG, we have access to over 40,000 trailers across Europe, covering a full spectrum of transport needs. From standard curtain-sided trailers and Euroliners to semi-low loaders, heavy-duty low loaders, and multi-axle modular units, we have the right equipment for any cargo - no matter the size, weight, or complexity.

Sea Freight Beyond the Box

Containers may be the workhorse of global shipping - but real expertise begins where standard solutions end. When cargo won't fit into a regular container, that's when things get interesting. STG has decades of experience finding creative sea freight solutions for out-of-gauge and specialist loads. Whether it's break bulk, Roll-On/Roll-Off, a coastal feeder, or a heavy-lift vessel, we've done it - including the use of a tank landing craft!

Air Freight When Time Is Everything

When every minute counts, air freight is often the only solution. From a single urgent spare part flying from Japan to the UK, to a complete production line delivered from Bologna to Shanghai within 24 hours - STG rises to the challenge. Whether your cargo calls for scheduled air services or dedicated charter aircraft, we have the experience and global network to make it happen.

Projects Turnkey by Design

Some freight moves demand more than just transport - they require total coordination. STG delivers fully integrated project logistics, combining land, sea, and air to meet the demands of complex, large-scale operations. But it doesn't stop there. We manage everything from cargo inspections, dismantling, and packing to route surveys, permits, cranes, forklifts, and site handling - each project carefully tailored to the task at hand.

Road Freight - From Local Runs to Epic Journeys

Road transport is invariably the first and last leg for any cargo movement – and STG handles it all, **from local deliveries to international overland transport**. Whether it's an urgent shipment across town or a complex convoy **across continents**, we bring the experience, equipment and agility to make it happen.

Sea Freight - Global Reach, Tailored Solutions

At STG we deliver far more than just container shipping. We offer flexible sea freight services from **small coastal moves to global heavy-lift vessels**. Whether you're shipping break bulk, oversized machinery or connecting to an international route – STG provide the **right maritime solution for your cargo**.

Air Freight - Where Time is of the Essence

Sometimes, **speed is everything** - and air freight is the only solution. However, this is only part of the picture. Ensuring cargo reaches the designated aircraft on time, is retrieved promptly upon arrival, and is swiftly forwarded to its final destination is just as vital.

Whatever the challenge, STG will find the most efficient and cost-effective solution - without compromising on timing.

Projects

At STG, every movement is treated as **a project** - whether it's a single crate or a multi-phase global relocation. Simple or complex, local or international, each job receives the same meticulous attention to detail.

We take a **hands-on approach**. While we make full use of digital systems, every contract is supported by a physical Project File, complete with detailed checklists and controls to ensure that nothing - however minor - is overlooked.

Every client is assigned a **dedicated Account Manager** - a single, consistent point of contact. Behind them stands the full STG team, with Account Managers actively sharing knowledge and experience to deliver the best result, no matter the challenge.
